

Special Olympics Canada Language Guidelines

Language Guidelines

Words matter

Understanding the power of words, a series of language guidelines have been developed to promote respect among those involved with Special Olympics Canada, as well as the public.

Words can open doors to cultivate the understanding and respect that enable people with disabilities to lead fuller, more independent lives. Words can also create barriers or stereotypes that are not only demeaning to people with disabilities, but also rob them of their individuality.

The following language guidelines have been developed by experts for use by anyone writing or speaking about people with an intellectual disability to ensure that all people are portrayed with individuality and dignity.

Appropriate Terminology

- Refer to participants in Special Olympics as Special Olympics athletes rather than Special Olympians or Special Olympic athletes (note: the pluralization of Olympics).
- Refer to individuals, persons or people with an intellectual disability, rather than intellectually disabled people, the intellectually disabled, or handicapped.
- A person has intellectual disabilities, rather than is suffering from, is afflicted with or is a victim of intellectual disabilities.
- Distinguish between adults and children with intellectual disabilities. Use adults or children, or older or younger athletes.
- “Down syndrome” has replaced Downs Syndrome and mongoloid.
- Refer to participants in Special Olympics as athletes. In no case should the word athletes appear in quotation marks. This would also apply to patients.

- When writing, refer to persons with a disability in the same style as persons without a disability: full name on first reference and last name on subsequent references. Do not refer to an individual with intellectual disabilities as “Bill who has _____”

Terminology to Avoid

- **Refer to the person’s disability only when it is relevant and necessary. Patient-centric care is essential**
- Do not use the label “kids” when referring to patients with an intellectual disability. Adult patients are an integral part of the movement.
- Do not use the adjective “unfortunate” when talking about persons with an intellectual disability.
- Disabling conditions do not have to be life defining in a negative way.
- Do not sensationalize the accomplishments of persons with disabilities. While these accomplishments should be recognized and applauded, people in the disability rights movement have tried to make the public aware of the negative impact of referring to the achievements of people with physical or intellectual disabilities with excessive hyperbole.
- **Use the word “special” with extreme care when talking about persons with intellectual disabilities. The term, if used excessively in references to Special Olympics athletes, patients and activities, can become a cliché.**
